HOT WATER

The Ruud Automatic Gas Water-Heater is different—essentially better than all other water-heaters. The difference is a pronounced betterment in hot water service.

Imagine for a minute an ideal hot water service—wouldn't it begin and end at the faucet? The

RUUD Automatic Gas Water-Heater

has done just this, it has reduced the hot water problem to a turn of the faucet—it's as easy to get steaming hot water now as cold water—you don't go near the Ruud itself—you don't have to strike even a match.

The Ruud differs from ordinary water-heaters in efficiency—it is independent of the kitchen range—a luxury in summer time—stands in your basement—self-operating and safe.

Finally, there's a difference in the hot water—never "lukewarm," but always heated to a fixed temperature predetermined by yourself—and the water is fresh, taken clear and cold from the water mains and heated instantly as it flows.

The initial cost of the Ruud is the final cost—so moderate that you cannot afford to buy a cheaper water-heater—or to put up longer with the vexations of the old one. Study this mechanical masterpiece at close range. Investigate NOW.
